## Why is my mic not working on ps4 fortnite

Hey, buddy, can you hear me? When playing Fortnite on PC, you can't talk to your mates because your mic doesn't work in Fortnite? You're not alone. Many Fortnite players have recently been reporting this issue. But don't worry, it's fixable! And in most cases, the fix is pretty fast and simple... How to fix Fortnite mic not working? Here are 5 methods that have helped many players get their mic working in Fortnite again. You don't have to try them all; just work your way down the list until you find the one that works for you. Method 1: Set your microphone as your default device Many players got their mic working in Fortnite by setting their microphone as the default recording device on PC. You can follow these steps to try fixing your Fortnite mic not working issue: You need to disable Voice Chat in Fortnite first. In Fortnite, click the 3 lines on the top right, then select the cog icon to open the settings menu. At the top of the screen, click the speaker icon to view the Audio settings. Turn off Voice Chat, then click Apply at the bottom. Close Fortnite. Right-click the volume icon in the bottom-right part of your screen, then select Sounds. Click the Recording tab. Right-click on the device you want to use, and select Set as Default Device. Note: You can try speaking into your microphone to test if it's working properly. If it is, you should see a green bar rising next to it while you talk. Right-click on and disable every other input device except the one you want to use. (If you have any other output devices, repeat for the Playback tab). Click OK. Open Fortnite again, go to the settings menu and turn Voice Chat on. Join a squad or duo to test if your mic works now. If not, try Method 2 below. Method 2: Update your audio driver A missing or outdated audio driver may also stop mic from working in Fortnite. You can try updating your audio driver to better troubleshoot the problem. There are two ways you can update your audio driver — manually and automatically. Update your audio driver manually — You can update your driver manually by going to the hardware manufacturer's website, and searching for the latest driver for your audio device. But if you take this approach, be sure to choose the driver that's compatible with the exact model number of your hardware, and your version of Windows. Update your audio driver automatically — If you don't have the time, patience or computer skills to update your driver manually, you can, instead, do it automatically with Driver Easy. You don't need to know exactly what system your computer is running, you don't need to risk downloading and installing the wrong driver, and you don't need to worry about making a mistake when installing. Driver Easy handles it all. Download and install Driver Easy.Run Driver Easy and click Scan Now. Driver Easy will then scan your computer and detect any problem drivers. Click Update next to any flagged devices to automatically download the correct version of their drivers, then you can install them manually. Or click Update All to automatically download and install them all automatically. (This requires the Pro version — you'll be prompted to upgrade when you click Update All. You get full support and a 30-day money back guarantee.)Restart your computer and check if your mic now works properly in Fortnite. If it doesn't, contact Driver Easy's support team at support@drivereasy.com for further assistance. They'd be happy to help you. Or you can move on to Method 3 below. Method 3: Restart the Windows Audio service Another solution to your Fortnite mic not working problem would be restarting the Windows Audio service: On your keyboard, press the Windows logo key+R at the same time to invoke the Run box.Type services.msc and click OK. Find and right-click on Windows Audio, then click Restart on the upper left. Close the Services window.Relaunch Fortnite to see if your mic is working now. Method 4: Allow apps to access your mic Many computers had a kind of privacy settings reset after a major Windows 10 update in April 2018, which may have caused Fortnite unable to access your microphone. You can check for it through Windows Settings. Here's how: In the Windows search box, type Settings, then select the matching result. Click Privacy.In the left pane, click Microphone. In the right pane, click the Change button, and you'll see your mic is turned on. Also make sure All apps to access your microphone is enabled:In the section of Choose which apps can access your microphone, verify that Fortnite is turned on.Test in Fortnite. If the above methods didn't work for you, your Fortnite mic not working problem is probably being caused by system issues. Then, you can check for Windows updates. Type update in the Windows search box, then press Enter.Click check for updates in the pop-up window.Install all identified updates to troubleshoot the issue. That's it. You're more than welcome to leave a comment below to share your results or any other suggestions. Enjoy your game! Important: If you are in Egypt you won't be able to use voice chat in Fortnite due to the country blocking VOIP technology.There are a few reasons your voice chat might not be working in Fortnite, but we have some troubleshooting steps that solve the most common issues. Our Fortnite Community team updates this Trello board whith the latest known issues which may include voice chat problems. Be sure to check out the board first for the latest information to see if there are any known voice chat issues.Check the Epic Games server statusCheck the Epic Games Server Status page to make sure all systems are operational. If voice chat is affected by an outage or system-wide issue, your issue may be fixed when the outage is resolved. Turn up your voice chat volumeBe sure your volume is turned up (50% or higher) so you can hear it. If the volume is too low or the volume of your headset or speakers is too low, you won't be able to hear your teammates.Make sure you're in the right voice chat channel. If you're in the incorrect channel this may cause issues with you being able to hear teammates.If you are cross-playing on multiple platforms,Fortnite has two channels to use: Party Channel and Game Channel. In-game, you can switch between chat channels using the Social menu:Party Channel connects players in the same party (queued up in the lobby together).Game Channel connects players on the same team but in different parties (filled into a team-based game mode).You might also be in Xbox or PlayStation Party Chat, both of which will keep Fortnite's voice chat from working. If you want to use Fortnite's voice chat, you must leave Xbox or PlayStation Party Chat to use Fortnite voice chat, even if nobody else is there. If you don't know how to leave Xbox or PlayStation Party Chat, please check out Microsoft or Sony support.Adjust parental control settingsIf you have parental controls turned on in Fortnite, you may need to change your settings so voice chat will work.In the parental control settings page, make sure Filter Mature Language is set to OFF and Voice Chat is set to ON.If you are under the Age of 10 and you are located in the UK or EU. You will not be able to use the Voice chat feature, regardless of the parental controls settings.For more information on Parental Control check out this page.Open required network portsOur voice chat uses a protocol called XMPP. This protocol requires that the network ports 5222 and 433 are opened to be able to connect to it. For more information on how to open your network ports check out this article here.Xbox troubleshootingAdjust DNS settings You can adjust your DNS settings which may fix voice chat issues. Press the Xbox button on your controller.Go to System tab > Settings > Network > Select Network Settings > Advanced Settings.Save the existing DNS servers on this screen by writing them down on a separate piece of paper or your mobile device. If these changes don't work, you can change them back to the original DNS settings.Select DNS settings, and then select Manual.Enter the following new DNS servers:Primary DNS: 8.8.8.8Secondary DNS: 8.8.4.4Note: You'll need to enter both Primary and Secondary DNS settings.If you're asked to set MTU, enter 1473.Retry voice chat. Set your privacy and online safety settings for cross-platform playMake sure your privacy and online safety settings are set up for cross-platform play. On Xbox, press the Xbox button to open the guide, and then go to System > Settings > Account Select Privacy & online safety > Xbox Live privacy > View details and customize > Communication & multiplayer.Note: If you're setting up voice chat for a family member, from Account, select Family settings > Manage family members. Choose a family member, and then follow Step 2 above.Choose settings for the following options:You can play with people outside of Xbox Live. This allows or prohibits all cross-network play. Click Allow to use voice chat.You can communicate outside of Xbox Live with voice & text.When you allow cross-network play, you control who can communicate with you. Choose Everybody, Block, or In-game friends.Retry voice chat.Clear Xbox cachePress and hold the power button on the front of the Xbox until it turns off completely. Pull the power cable out the back of the Xbox. Press and hold the power button on the Xbox several times to expel any remaining power and clear the cache. Leave unplugged for at least 30 seconds. Plug the power cable back in. Turn the Xbox back on as you would normally. Please attempt to use your voice chat in FortniteEnable UPnP on your routerNavigate to your router login page.Note: For more details on logging in to your router, search online for guides related to your specific model.Log in to your router using your router credentials.Navigate to the UPnP menu on your router.Note: The steps to find this menu vary between routers, so search for specifics on your router. If UPnP isn't available, we recommend port forwarding.Enable UPnP.Save your changes.Open the Settings app on your Xbox.Select the Network tab.Select the Test NAT type tile. You should now have Open NAT on your Xbox.Retry voice chat.PlayStation troubleshootingAdjust DNS SettingsYou can adjust your DNS settings which may fix voice chat issues. Go to Settings > Network > Setup internet connection.Choose your connection type.Note: Options are Wi-Fi or LAN. (LAN is much faster.)Choose Custom setup.Choose Automatic IP address settings.Do not specify a DHCP Hostname.For DNS Settings select Manual.Enter the following Primary and Secondary DNS:Primary DNS: 8.8.8.8Secondary DNS: 8.8.4.4Choose Test Internet Connection to make sure you're still connected to the internet.Retry voice chat.Note: Players on PlayStation 5 will experience voice chat interruptions when loading Fortnite but it should return after you successfully load into Fortnite.Nintendo Switch troubleshootingAdjust DNS SettingsYou can adjust your DNS settings which may fix voice chat issues. From the Switch Main Menu go to Settings.Go to Internet.Go to Internet Settings.Select your connection and go to Change Settings.Adjust DNS Settings to Manual.Enter the following Primary and Secondary DNS:Primary DNS: 8.8.8.8Secondary DNS: 8.8.4.4Leave MTU Settings alone.Make sure Proxy Settings are turned Off.Retry voice chat.PC troubleshootingWindows UpdatesVoice chat requires that Windows is fully updated. Make sure to run Windows Updates as outlined here.Voice chat settingsMake sure you have voice chat enabled in settings and check whether you're using Push-to-Talk to communicate. The default options should work for input and output devices as long as your Windows settings are set to the sound device you are using. If you are having issues with voice chat not working, you can change your input or output devices to the sound device you are using. To change your default devices:Click on Start.Type Control Panel and press Enter.Click Sound.On the Playback tab click the output device (Speakers/Headphones) you want to use as your default, and then right-click it and select Set as Default Device.Click the Recording tab, then click the input device (microphone) you want to use as your default, and then right-click it and select Set as Default Device.Click Apply, and then click OK.Note: If you have Parental Controls enabled, you'll have to enable voice chat in your Parental Controls settings to use it. Parental Controls settings can't be changed in the normal audio settings.Mac troubleshootingMicrophone permissionsMicrophones on Macs need to be granted access to function in Fortnite.To use your microphone successfully on your Mac, make sure Fortnite has permission to access it. Please visit this support article on Apple's website to make sure Fortnite can use your microphone.Adjust the SIP-ALG router settingIf you are using a router to connect to the internet you may need to disable the SIP-ALG setting to allow voice chat to work. Reach out to your router manufacturer for instructions on how to do this as this varies model to model.
